EXPERIENCE

Airbus India — Data & AI Engineering Intern

Architected FP-BOT, a Dockerized RAG pipeline deployed via Jenkins CI/CD for natural-language querying of technical documentation via FastAPI.

Built AirSimuPy, a Python + PySide6 simulation platform executing block-diagram data pipelines on NetworkX graphs with NumPy, via a Hybrid Compiled Architecture.

Executed mathematical validation of a Python-based Sorting Tool against legacy Fortran solvers.

PROJECTS

Autonomous AI Research Agent — Pydantic AI × Gemini, daily digests via GitHub Actions

Personalized AI Financial Advisor — Agentic RAG (LangChain ReAct), Llama-3 8B fine-tuned via Unsloth

MapMyNotes — NLP study companion (Streamlit + Google Gemini) turning text into mind maps

Pediatric Bone Age Prediction — DenseNet201 + SE-ResNet50 ensemble for medical diagnostics

IoT Actuator Control — Arduino Uno + ESP8266 hardware integration

LEADERSHIP & ACHIEVEMENTS

- National Finalist — Chaitanya: The Leadership Event, Atharv Ranbhoomi'24, IIM Indore (Team INNOV8, top 20 of 977)
- GDSC Lead (2023-24) — Google Developer Student Clubs
- Techinnovation 6th Rank Winner — IIT Kanpur (x2: CCTV analytics frontend, top 5 of 25,000; environmental monitor)
- Organizing Committee — WittyHacks 4.0, NMIMS Indore
- Top 10 — Execute Hackathon, Technxex-Turing Club (AI fashion try-on, TensorFlow + OpenCV)
- Winner — GDSC Oracle Challenge 2023

SKILLS

Data Engineering & Cloud: AWS · Docker · Kubernetes · Kafka · ClickHouse

AI & Machine Learning: PyTorch · LangChain · RAG

Backend: Python · C++ · FastAPI

EDUCATION

B.Tech, Computer Engineering — NMIMS Indore

Languages: English · Hindi · Korean (I)
